

Tub to Heaven

In today's fast-paced world, more and more people are starting to value being close to nature, taking every opportunity they can to spend some time outdoors and relax.

The Tub To Heaven mobile bathing tub with its innovative heating system, stainless steel interior, good insulation and a powerful boiler will satisfy even the most demanding bathers.

The carpet-covered and heated staircase leading up to the tub has leather-covered handrails on both sides. Together they will make it safe and comfortable to bathe in any weather.

Both the bathing tub and the trailer come with covers that will keep the tub clean during transport and between baths.

The specially designed and hot-dip galvanized frame makes the trailer sturdy and durable while the LED lights make it safe to transport the mobile bathing tub.

Tub to Heaven

Stainless steel is resistant and a good thermal conductor, which means it is the best material for producing a durable and low maintenance bathing tub.

Because stainless steel is a good thermal conductor, even the edge of the tub that is not submerged in water will be pleasantly warm during winter.

The bathing tub and the boiler are insulated with a layer of special insulation foam that is up to 10 cm thick and that will ensure that the water will be heated as quickly as possible and will stay warm for longer.

Tub to Heaven

To ensure safety when entering and exiting the bathing tub even in crisp cold winter temperatures, the Tub To Heaven bathing tub comes with a heated staircase with a soft carpet covering. The heated staircase has leather-covered railings on both sides which makes them nice and warm to hold onto even in cold weather.

There are two different hanging shelves that can be attached to the edge of the tub, making it easy to store your drinks and snacks on them.

Next to the boiler, there is a metal rack for storing firewood and keeping the logs dry and at hand, both during transport and heating. The tub comes with a boiler that is powerful enough to heat an entire house, making it very quick to heat

The bathing tub has been fitted with four feet that can easily be adjusted to level the bath out on uneven surfaces as well.

There are four precise spirit levels by the feet of the tub, which help with adjusting the tub.

Tub to Heaven

The bathing tub has been fitted on a specially made hot-dip galvanised frame to guarantee a long and maintenance-free lifespan.

The Tub To Heaven mobile bathing tub comes with two different covers to ensure that the bath stays clean both during transport and between baths.

The cover for the whole trailer protects the tub during transport and storage.

The cover for the tub itself keeps it clean between baths.

The mobile bathing tub comes with durable LED lights that ensure safe travel in all weather conditions.

The stainless-steel mobile bathing tub has a diameter of 1.8 metres and a volume of 2000 litres. The boiler is 30 kW, firebox depth is 60 cm. The chimney for the boiler totals 2 meters (in two parts).

Thanks to the innovative heating system, good thermal insulation and a powerful but efficient boiler, it only takes 2.5-3 hours to heat up 2000 litres of ice-cold water for bathing during the winter. At -20C it takes only two armfuls 50-cm firewood logs (which would amount to two log bundles sold at most petrol stations) to heat up the bathwater.

Tub to Heaven

The set includes:

- ▶ Stair carpeting
- ▶ Bathing tub cover
- ▶ Trailer cover
- ▶ Hanging shelves for food and drink
- ▶ Waterproof LED lights
- ▶ Thermometer
- ▶ Paddle for mixing the water
- ▶ Stands for support feet
- ▶ Cleaning net
- ▶ Fire poker
- ▶ Boiler cleaning brush
- ▶ 10 metre emptying hose
- ▶ Removable stainless steel chimney
